

GATEWAY COMPATIBILITY

The list below displays the compatibility of Shelly Qubino devices with the gateways we have tested our devices on. As a rule of thumb, Shelly Qubino devices are compatible with all Z-Wave certified gateways.

HOME ASSISTANT V 10.3+ WITH Z-WAVE JS OR Z-WAVE JS UI

- The gateway performs a complete integration through device interrogation, and it sets everything correctly.
 - All our Shelly Wave devices are fully functional.
 - It offers the capability to seamlessly add devices using SmartStart and supports Over-The-Air (OTA) updates.
-

FIBARO HC3 V 5.140.17+ (Z-WAVE ENGINE 3)

- The gateway performs a complete integration through device interrogation, and it sets everything correctly.
 - All our Shelly Wave devices are fully functional.
 - It offers the capability to seamlessly add devices using SmartStart and supports Over-The-Air (OTA) updates.
-

FIBARO HC3 V 5.140.17+ (Z-WAVE ENGINE 2)

- The gateway performs a partial integration through device interrogation, and it does not set the properties and the lifeline correctly.
- In order that the Multichannel devices (Wave 2, 2PM, Pro 2, Pro 2PM, Pro 3, ...) the user must set the lifeline correctly - check the support portal.
- The gateway does not have the capability to add devices using SmartStart and does not support Over-The-Air (OTA) updates.

HOMEE GEN 7 CUBE FW VER. 7.19+

- The gateway performs a complete integration through device interrogation, and it sets everything correctly.
 - All our Shelly Wave devices basic functions are fully functional the gateway lacks the ability to set associations.
 - It offers the capability to seamlessly add devices using SmartStart and supports Over-The-Air (OTA) updates.
-

HOMEE GEN 5 CUBE FW VER. 3.95.0

- The gateway performs a partial integration through device interrogation, and it does not set the lifeline correctly.
 - The user can't set the Multichannel devices (Wave 2, 2PM, Pro 2, Pro 2PM, Pro 3, ...) lifeline to make them work properly.
 - The gateway does not have the capability to add devices using SmartStart and does not support Over-The-Air (OTA) updates and setting the associations.
-

HOMEEY 2018 WITH SHELLEY APP VER. 3.21.5+

- The gateway performs a partial integration based on the interview with the device, for a full support of our devices the Shelly app need to be installed.
 - All our Shelly Wave devices are fully functional with the Shelly app.
 - The gateway does not have the capability to add devices using SmartStart and does not support Over-The-Air (OTA) updates.
-

SMARTTHINGS (HUB V2 2015) FW 000.049.00009+

- The gateway performs a partial integration based on the interview with the device, and a custom integration (Edge driver) is needed for complete functionality.
- All our Shelly Wave devices are fully functional with our Edge driver
- The gateway does not have the capability to add devices using SmartStart and does not support Over-The-Air (OTA) updates.
